

# Opti-Care Balancer

Nutrient-Rich, Multi-Purpose Balancer with a Low Starch, Non-Heating Formulation

## Main Ingredients

Soya bean meal, Wheat feed, Soya bean hulls, Soya beans toasted, Sunflower meal, Wheat, Molasses, Alfalfa, Whey powder, Soya bean oil.

## Key Features

- 20% protein, low-starch, oat-free feed with four times the normal levels of minerals and vitamins.
- Low feed rate provides vital amino acids, minerals and vitamins while controlling energy supply.
- Extra energy can be supplied by adding in oats or a reduced quantity of a suitable Gain feed.
- Useful dietary addition when feeding less than recommended quantities of a suitable Gain feed.
- Excellent for broodmares to meet mineral and vitamin requirements at all stages.
- Ideal for foals, weanlings and yearlings not requiring further condition.
- Recommended for young stock prone to DOD, including OCD, epiphysitis of a mix or pellet.
- Balancing ratios by weight (Opti-Care:Oats):- 1:2=13% Protein. 1:1=15% Protein.
- Low starch suits horses prone to laminitis, metabolic syndrome, cushings disease and “tying up”.
- Oat-free composition and low feeding rate help reduce “fizzy” behaviour.
- Soya bean meal provides excellent quality protein for development, muscle repair and lactation.
- Milk whey powder provides an additional source of readily available protein amino acids.
- Concentrated levels of minerals including calcium, phosphorous, salt and magnesium.
- Bioplex protected trace elements including Copper, Zinc and Manganese maximise availability.
- Selplex® protected selenium helps to boost antioxidant status.
- Fortified with high levels of Vitamin A, D3, K and a full range of B vitamins.
- Provox natural plant antioxidants improve vitamin E utilisation.
- Yea-Sacc® live yeast helps promote fibre digestion, nutrient absorption and good gut function.

## Instructions for Use

Complementary feed for horses and ponies as a supplement to forage and water. Maximum feeding rate 0.4kg/100kg bodyweight/day. Concentrated source of minerals, vitamins and protein for a low feeding rate. Feeding 100g/100kg bodyweight/day provides a sound diet base for adult horses and ponies.

## Feeding Guidelines

GAIN Opti-Care Balancer	Foal 3-6 Months	Young Stock	Mare Pregnant	Mare Lactating	Mare Barren	Adult Leisure
Thoroughbred (kg) g/100 kg bodyweight/day	0.25 - 0.50	0.50 - 0.75	1.0	1.25	0.50	0.50
	250	200	200	250	100	100

## Analytical Constituents

DE MJ/kg	Protein %	Oil %	Fibre %	Vit. A iu/kg	Vit. D <sub>3</sub> iu/kg	Vit. E iu/kg	Cu mg/kg	Se mg/kg
12.0	20.0	5.0	10.0	60,000	8,000	1,200	170	1.30
